RE: City of Pompano Beach Public Library & Cultural Center LEED Modeling

Dear Mr. Moltay:

I am writing this letter to commend you on the excellent service you recently provided our firm. We commissioned your office to complete an energy model of a complicated 46,000 square foot Library and Cultural Center building in South Florida for submittal to the USGBC for LEED certification. Your office not only completed the model within an exceptionally rapid time frame, but you also submitted the information and had the entire model and all anticipated credits approved in the first submittal by the LEED reviewer.

Communication with your office was easy and you responded to all of our questions very quickly and professionally. It was a pleasure working with you and I highly recommend your office for any similar projects.

Please let me know should you need anything else.

Sincerely,

Alejandro Silva, AIA
